EMCO

World leader in the design and manufacture of EMC Antennas and EMC test accessories. Products include G-TEM test cells, towers, turntables, controllers, LISNS, near field probes, current probes, bulk current injection probes, etc.

Rantec / Rayproof

America's largest designer and manufacturer of EMC test chambers for radiated susceptibility and emissions. Also, pre-compliance rooms, shielded enclosures, MRI rooms plus fully anechoic and tapered chambers for antenna and telecommunications testing.

Lindgren RF Enclosures

The world's largest shielded enclosure manufacturer. Product styles include welded, modular, copper screen and double isolated rooms plus associated accessories such as doors, waveguides, vents, etc.

Holaday Industries

Holaday is dedicated to the development and manufacture of electromagnetic radiation measurement and safety products. They offer a comprehensive line of instruments, accessories and services for EMF radiation hazard markets, complemented by a world-class calibration facility and an application engineering staff that can provide for your specialized needs.

Acoustic Systems

For 3 decades, Acoustic Systems has researched, designed and manufactured noise control enclosures with cutting-edge sound isolation technology. By combining groundbreaking scientific research with modular construction techniques, they ensure that their enclosures meet pre-determined acoustic performance criteria while being cost-effective, re-locatable, and easier to assemble in the field when compared to conventional construction. They regularly submit products to rigorous acoustic testing in their NVLAP accredited laboratory.

Amplifiers

ETS-Lindgren offers a wide range of RF power amplifiers for any EMC test application. These amplifiers produce excellent output power levels, while maintaining an efficient performance level. We offer a complete line of solid state amplifiers for Radiated Immunity and RF testing.

www.ametek.com

Electronic Instruments - a leader in the design and manufacture of advanced instruments for the aerospace, power, process and industrial markets.

Electromechanical - a differentiated supplier of electrical interconnects, precision motion control solutions, specialty metals, thermal management systems, and floor care and specialty motors.

(for MD, VA and NC)

Communications & Power Industries

Provides microwave, radio frequency, power and control solutions for critical defense, communications, medical, scientific and other applications. CPI develops, manufactures and distributes products used to generate, amplify, transmit and receive high-power/high-frequency microwave and radio frequency signals and/or provide power and control for various applications.

<http://www.keysight.com>

Keysight Technologies, or Keysight, is an US company that produces test and measurement equipment and software.

www.kgs-ind.com

Product lines comprise a wide range of ferrite products for EMI suppression, cable shielding materials, grounding fasteners and conductive gaskets. Other product line segments include a complete selection of plastic fasteners and hardware for the electronic packaging, optical fiber inspection equipment and thermal management components.
