

Line Card

www.ets-lindgren.com

EMCO

World leader in the design and manufacture of EMC antennas and EMC test accessories. Products include G-TEM test cells, towers, turntables, controllers, LISNS, near field probes, current probes, bulk current injection probes, etc.

Rantec / Rayproof

America's largest designer and manufacturer of EMC test chambers for radiated susceptibility and emissions. Also, pre-compliance rooms, shielded enclosures, MRI rooms plus fully anechoic and tapered chambers for antenna and telecommunications testing.

Lindgren RF Enclosures

The world's largest shielded enclosure manufacturer. Product styles include welded, modular, copper screen and double isolated rooms plus associated accessories such as doors, waveguides, vents, etc.

Holaday Industries

Holaday is dedicated to the development and manufacture of electromagnetic radiation measurement and safety products. They offer a comprehensive line of instruments, accessories and services for EMF radiation hazard markets, complemented by a world-class calibration facility and an application engineering staff that can provide for your specialized needs.

Acoustic Systems

For 3 decades, Acoustic Systems has researched, designed and manufactured noise control enclosures with cutting-edge sound isolation technology. By combining groundbreaking scientific research with modular construction techniques, they ensure that their enclosures meet pre-determined acoustic performance criteria while being cost-effective, re-locatable, and easier to assemble in the field when compared to conventional construction. They regularly submit products to rigorous acoustic testing in their NVLAP accredited laboratory.

AMPLIFIERS

www.ets-lindgren.com

ETS-Lindgren offers a wide range of RF power amplifiers for any EMC test application. These amplifiers produce excellent output power levels, while maintaining an efficient performance level. We offer a complete line of solid state amplifiers for Radiated Immunity and RF testing.

www.ametek.com

AMETEK consists of two operating groups, both with highly differentiated technology and leading positions in niche markets:

Electronic Instruments – a worldwide leader in the design and manufacture of advanced analytical, test and measurement instrumentation for the energy, aerospace, power, research, medical and industrial markets.

Electromechanical – a differentiated supplier of automation and precision motion control solutions, and highly engineered electrical interconnects, specialty metals and thermal management systems.

www.gauss-instruments.com

Gauss Instruments is developer and manufacturer of the TDEMI Measurement System that uses ultra-high-speed analog-to-digital converters and real-time digital signal processing systems to enable ultra-fast tests and measurements for electromagnetic compliance that fulfill the demand for measurements of today's complex electronic equipment and systems.

TDEMI ULTRA is the latest and most powerful measurement equipment for emission testing on the market. The TDEMI Ultra has the highest measurement speed, highest accuracy, incredible dynamics and new operation modes along with the latest and most advanced level of full digital measurement equipment for emission testing available today. It is based on the unrivaled and patented TDEMI® real-time technology of GAUSS INSTRUMENTS.

www.keysight.com

World leader in EMC test products including EMI receivers, Spectrum analyzers and signal generators for EMC compliance and precompliance testing. Keysight's EMI and EMC test products help you meet all regulatory requirements for EMC compliance.

www.kgs-ind.com

Product lines comprise a wide range of ferrite products for EMI suppression, cable shielding materials, grounding fasteners and conductive gaskets. Other product line segments include a complete selection of plastic fasteners and hardware for the electronic packaging, optical fiber inspection equipment and thermal management components.

www.spirent.com

Products for assuring the QoE for connected devices and services. Spirent's Connected Devices group helps those who connect people and things at the edge of the network meet their promise of delivering the very best end-user experience. Their solutions reveal the performance of wireless networks, equipment, devices and chipsets for radio frequency (RF), location, video, audio and data connectivity. Spirent helps their customers deliver services and devices faster, with lower cost, and peak performance. Spirent's many products include solutions for Radio Frequency (RF) Channel Emulation, Automated Device Lab Testing, User Experience Measurement and Device Field Evaluation.

www.captorcorp.com

Captor is the leader in the field of high quality customer EMI/RFI/EMP and Tempest filters. Captor supplies RF filter products from feedthrough caps all the way to next level assemblies. Their custom solutions can be delivered faster and at a more competitive cost than their competitors' so-called "off the shelf" or COTS parts

Hoview Industrial Limited

www.hoview.com

- AC/DC Power Supply Cords & Flexible Cords
- Assembly of Cable Accessories
- OEM/ODM Electrical Products

EMC Eupen

www.emceupen.com

- Filtered Power Cords - UL/CSA, CE
- Custom Power Supply Cords
- Ferrite EMI Absorbing Cables and Wire
