

Line Card

www.ets-lindgren.com

EMCO (Antennas , Lab component and Instrumentation)

World leader in the design and manufacture of EMC antennas and EMC test accessories. Products include G-TEM test cells, towers, turntables, controllers, LISNS, near field probes, current probes, bulk current injection probes, etc.

Rantec / Rayproof (Anechoic Chambers)

America's largest designer and manufacturer of EMC test chambers for radiated susceptibility and emissions. Also, pre-compliance rooms, shielded enclosures, MRI rooms plus fully anechoic and tapered chambers for antenna and telecommunications testing.

Lindgren RF Enclosures (Shielded Enclosures)

The world's largest shielded enclosure manufacturer. Product styles include welded, modular, copper screen and double isolated rooms plus associated accessories such as doors, waveguides, vents, etc.

Holiday Industries (RF and Safety Probes)

Holiday is dedicated to the development and manufacture of electromagnetic radiation measurement and safety products. They offer a comprehensive line of instruments, accessories and services for EMF radiation hazard markets, complemented by a world-class calibration facility and an application engineering staff that can provide for your specialized needs.

Acoustic Systems (Acoustic Chambers and Rooms)

For 3 decades, Acoustic Systems has researched, designed and manufactured noise control enclosures with cutting-edge sound isolation technology. By combining groundbreaking scientific research with modular construction techniques, they ensure that their enclosures meet pre-determined acoustic performance criteria while being cost-effective, re-locatable, and easier to assemble in the field when compared to conventional construction. They regularly submit products to rigorous acoustic testing in their NVLAP accredited laboratory.

AMPLIFIERS

www.ets-lindgren.com

ETS-Lindgren offers a wide range of RF power amplifiers for any EMC test application. These amplifiers produce excellent output power levels, while maintaining an efficient performance level. We offer a complete line of solid state amplifiers for Radiated Immunity and RF testing.

www.gauss-instruments.com

Gauss Instruments is developer and manufacturer of the TDEMI Measurement System that uses ultra-highspeed analog-to-digital converters and real-time digital signal processing systems to enable ultra-fast tests and measurements for electromagnetic compliance that fulfill the demand for measurements of today's complex electronic equipment and systems.

TDEMI ULTRA is the latest and most powerful measurement equipment for emission testing on the market. The TDEMI Ultra has the highest measurement speed, highest accuracy, incredible dynamics and new operation modes along with the latest and most advanced level of full digital measurement equipment for emission testing available today. It is based on the unrivaled and patented TDEMI® real-time technology of GAUSS INSTRUMENTS.

<https://vectawave.com/>

Vectawave Technology Ltd. was founded in 1997 by engineers with a wealth of experience in the design and manufacture of Class A power amplifiers for EMC applications. Vectawave power amplifiers are available with frequency ranges from 10kHz to 6GHz and power levels up to 4KW all made specifically for the EMC industry.

KITAGAWA INDUSTRIES America, Inc.

<https://www.kitagawa-ind.com/eng/>

Product lines comprise a wide range of ferrite products for EMI suppression, cable shielding materials, grounding fasteners and conductive gaskets. Other product line segments include a complete selection of plastic fasteners and hardware for the electronic packaging, optical fiber inspection equipment and thermal management components.

<https://www.vtechtextiles.com/>

Founded in 2006, V Technical Textiles, Inc. (VTT), manufactures EMI fabric products made from Statex Productions, ranging from portable RF shielding enclosures (tents) and EMC test chambers, RF curtains, pouches, and bags to specialized clothing. VTT is a fully functioning cut, sew, and design facility that provides its customers the flexibility of one piece prototyping to full production capabili

www.captorcorp.com

Captor is the leader in the field of high quality customer EMI/RFI/EMP and Tempest filters. Captor supplies RF filter products from feedthrough caps all the way to next level assemblies. Their custom solutions can be delivered faster and at a more competitive cost than their competitors' so-called "off the shelf" or COTS parts

Hoview Industrial Limited

www.hoview.com

Hoview Industrial Limited is an ISO 9001:2008 manufacturer of International power cords. They provide the highest quality of standard and custom cords for many different applications. All of their power supply cords are fully licensed and approved by the regulatory bodies of their respective countries, such as UL, CUL, SAA, PSE, BSI, VDE, SEV, IMQ, KEMA, DEMKO, NEMKO, FIMKO, SEMKO, CEBEC, OVE, etc.

- AC/DC Power Supply Cords & Flexible Cords ➤ Cable assemblies and Cable Accessories
- OEM/ODM Electrical Products

EMC Eupen

www.emceupen.com

EMC Eupen is the world's predominant supplier of EMI/RFI Filtered solutions for Power Cords, Shielded Power Cords and Ferrite Coated Cables. EMC Eupen Power Cords and Cables are used exclusively for:

- EMI/RFI mitigation
- EMC Compliance
- Secure communications propagation
- Tempest hardening
- High-end Audio applications
